Technical Skills

- **CAD:** SolidWorks, Fusion360
- **Programming:** MATLAB, Python, RStudio
- **Manufacturing:** CNC, Mill, Engine Lathe, 3D Printer, GOM Scanner, Calipers, Micrometers
- **Engineering Softwares:** Microsoft Excel, LoggerPro

Engineering Experience

- Maintenance & Manufacturing Intern
  - Harry's Popcorn (Summer of '26)
    - Diagnosed, repaired, and maintained manufacturing equipment to minimize production downtime.
    - Performed preventive maintenance and machine adjustments to improve manufacturing reliability.
    - Supported production of 100+ batches per week while maintaining quality and efficiency.
    - Assisted with inventory control, equipment setup, and daily manufacturing operations.
    - Collaborated with operators to troubleshoot equipment and improve production workflow.
- Operations Manager
  - Timmy's Pizza & BBQ (2024)
    - Led and trained a team of employees in a fast-paced production environment.
    - Managed scheduling, inventory, and daily operations.
    - Diagnosed equipment failures and coordinated repairs.
    - Maintained quality, safety, and operational standards.

Engineering Projects

- Baja SAE
  - Designed, manufactured, assembled, and tested an off-road competition vehicle.
  - Utilized SolidWorks to support component design and manufacturing.
- Autonomous Drawing Robot
  - Designed and programmed an autonomous robot capable of recognizing and reproducing images using MATLAB.
  - Integrated mechanical design, programming, fabrication, and testing.
- BattleBot
  - Designed and fabricated a combat robot using CAD, MATLAB, and additive manufacturing.
  - Applied iterative testing to improve performance and durability.
- CO_2 Powered Race Car
  - Designed and manufactured a lightweight aerodynamic race car.
  - Achieved the fastest competition time through design optimization.
- Precision Machining
  - Manufactured precision components using manual mills and engine lathes.
  - Interpreted engineering drawings and verified dimensions using precision measuring instruments.
- Other
  - Reverse engineered mechanical components using CAD and 3D printing.
  - Designed and assembled a Faraday flashlight.
  - Developed MATLAB applications including Tank Wars and Tic-Tac-Toe.
  - Created machined projects including puzzle blocks using manual mills and engine lathes.
